

Law is here

bit cz training Czech Republic – as the BRIGHT@EU Project Leader represents one of the four countries participating in partnership on the implementation and pilot testing of the newly developed BRIGHT@EU Online Platform.

BRIGHT@EU is a European Project focused on the legal information and knowledge in power of the citizens in the EU. The main intention of the project is to create a basic legal training and a validation system for legal literacy in Europe, allowing citizens the access to basic legal knowledge.

The main project outputs are:

- ***BRIGHT@EU Curriculum (analysis + main topics)***
- ***Development of specialized texts***
- ***BRIGHT@EU Online platform***
- ***E-book intercultural differences in the law context***

Initially our partnership has devoted to create a summary of all the legal bases in Europe and the countries which are part of the project (Czech, Germany, Cyprus and Spain). Then, we developed a comparative summary made with all the legal differences between them and now we are finishing a **curriculum** with the main themes for educational platform.

We are just realizing **the survey for target group** to extract the best educational content structure. You can see hereto the link for the survey so you can forward directly <https://www.surveymonkey.com/r/C7XVBBS> and participate our survey. After development of the specialized texts we will create the interactive educational online platform which will go through the pilot testing of target group. **The pilot testing** is planned for December 2017 – January 2018.

Meantime key people of our partnership had the opportunity to personally meet twice (in Prague and Gelsenkirchen) and the meetings were always very friendly and useful allowing the discussion of the major project themes.

The more detailed info about project and outputs you can find on websites: www.bright-eu.eu

Partners:
